Calibration Procedure for Air Flo D2646PVs and D3555PVs. If you're having trouble with an Air Flo controller that won't let you turn the speed down, you might have recalibrated the minimum run speed by accident. To set the minimum run speed to a more reasonable value, just follow this simple procedure: Make sure MODE SWITCH is set to PAUSE.

Spreader Gear: Air-Flo D2646PV / D3555PV Calibration Procedure

There are 48 3/8" X 1-1/2" slats with a 29-1/2" distance between the center of sprockets. The benefits of using our pintle chain are that they have fully heat-treated components, quad staked pins, open barrel design, and smooth operation. Additionally, we have a complete line of salt spreader sprockets to accompany the chain if needed. For ...
