maximum continuous power, and 250 shaft horsepower at 738 °C., 5-minute limit, for takeoff.

Allison 250-C10 Archives - This Day in Aviation

Allison adopted a reverse airflow engine configuration for the Model 250: although air enters the intake/compression system in the conventional fashion,

Get Free Allison 250 C10 Engine

the compressed air leaving the centrifugal compressor diffuser is ducted rearwards around the turbine system, before being turned through 180 degrees at entry to the combustor; the combustion products expand through the two stage HP turbine, which is connected, via the HP shaft, to the compression system, before expanding through the two ...

The Allison V-1710 aircraft engine designed and produced by the Allison Engine Company was the only US-developed V-12 liquid-cooled engine to see service during World War II. Versions with a turbocharger gave excellent performance at high altitude in the twin-engined Lockheed P-38 Lightning, and turbo-
