The people with the largest territory are the relatively isolated 19,000 Yanomami, who occupy 9.4 million hectares in the northern Amazon, an area about the same size as the US state of Indiana and slightly larger than Hungary.. The largest Amazonian tribe in Brazil is the Tikuna, who number 40,000.

### Brazilian Indians - Survival International

Over the last thirty years, the Amazon rainforest has become one of the main cattle ranching regions in the world. With 5 to 8% annual expansion, the growth of cattle herd is still strongly affecting forest resources in this region. Negative ecological impacts are evident, however economic and social constraint cannot always be generalized.

The history of slavery spans many cultures, nationalities, and religions from ancient times to the present day. However, the social, economic, and legal positions of slaves have differed vastly in different systems of slavery in different times and places. Slavery occurs relatively rarely among hunter-gatherer populations because it develops under conditions of social stratification.
