all had an electric coolant pump to help cool off the engine and turbos after the motor was shut off. The pump was a common leaker, generally around 100,000 miles. That secondary coolant pump lived underneath the intake manifold, in the middle of the heat. The factory came out with a kit to relocate it down near the ...

The 2.7T BiTurbo engine is a fantastic engine, but even new it had a reputation for having a relatively high number of small component issues.

Given the age of most vehicles with the 2.7T engine, it is important for the vehicle to be 100% healthy before having any performance software installed.
