Answered April 28, 2020. Birds are far more practical than sentimental and simply driven to survive and reproduce. As a general rule, birds only bother with building nests when it's spring or summer and time to lay eggs and rear young. If a parent bird leaves a nest of eggs or young to get food, and then returns to find the nest totally

Never pick up or handle wild bird eggs.

## Online Library Birds Nests Eggs Take Along Guides

Scents and oils from hands can contaminate the eggs and may harm the young birds or attract predators to the nest. Avoid stressing adult birds when they are brooding the eggs or adjusting their nests. If the adults become too stressed, they may abandon the nest completely and the chicks will not survive.
