Reporting and grading of abnormal red blood cell morphology

They are usually absent in the blood films of healthy individuals. It is useful to distinguish red cell variations between hereditary spherocytosis (HS) and acquired one. In HS, large numbers of almost the same size of Table 1. Reference guide for grading red blood cell morphology [1-4, 9-12]

Reporting and grading of abnormal red blood cell morphology

A white blood cell differential is a medical laboratory test that provides information about the types and amounts of white blood cells in a person's blood. The test, which is usually ordered as part of a complete blood count (CBC), measures the amounts of the five normal white blood cell types - neutrophils, lymphocytes, monocytes, eosinophils and basophils - as well as abnormal cell ...

White blood cell differential - Wikipedia

A complete blood count (CBC), also known as a full blood count (FBC), is a set of medical laboratory tests that provide information about the cells in a person's blood. The CBC indicates the counts of white blood cells, red blood cells and platelets, the concentration of hemoglobin, and the hematocrit (the volume percentage of red blood cells). The red blood cell indices, which indicate the ...
