Notes on Optimization was published in 1971 as part of the Van Nostrand Reinhold Notes on Sys-tem Sciences, edited by George L. Turin. Our aim was to publish short, accessible treatments of graduate-level material in inexpensive books (the price of a book in the series was about five dol-lars). The effort was successful for several years.

To find the optimal solution, a line on which the points have the same z-value is graphed. In a max problem, such a line is called an isoprofit line while in a min problem; this is called the isocost line. (The figure shows the isoprofit lines for  $z = 60$ ,  $z = 100$ , and  $z = 180$ ).  $F z = 180 z = 60$ .
