### Ford Falcon Engine Warning Light

Warning light name: Ford Falcon check engine warning light.

Description: The malfunction indicator light, often known as the 'check engine' warning light comes on for two possible reasons:

Comes on steady: If the check engine warning light stays on constantly, it indicates an emissions fault and is no longer operating within emissions regulations.

### Ford Falcon Dashboard Warning Lights - DASH-LIGHTS.COM

Engine warning light: One of the most sensitive lights on a Ford, the check engine light has two warning levels. For less serious issues (assuming the vehicle is operating normally), the light will stay on but remain steady. If the light blinks, however, there is a major issue. You should stop the vehicle as soon as it is safe to do so and contact ...

### Ford Falcon engine warning lights - Travellers Autobarn

There are three dashboard light colors on most dashboards: yellow, red, and orange (and, occasionally, blue or green). The most severe alerts are displayed in red or orange. Generally, if you see an orange or red warning light, pull over as soon as safely possible and drive cautiously to determine what is happening.

Recently my 2010 Ford FG G6E Turbo has been displaying a warning light on the instrument cluster indicating a DSC and ABS fault. This seems to happen intermittently and in any driving and road condition. The faults are cleared once the car is turned off and restarted. My Ford dealer hasn't been able to find the cause of the problem. What could it be?

The Ford Falcon is a full-sized car that was manufactured by Ford Australia from 1960 to 2016. From the XA series of 1972 onward, each Falcon and range of derivatives have been designed, developed, and built in Australia, following the phasing out of the American-influenced Falcon of 1960 to 1971, which had been re-engineered locally as the XK to XY series for the harsher Australian conditions.
