Free download Chemistry (10th edition) by Raymond Chang in .pdf published by McGraw-Hill in 2010. According to the author "from the first edition, my aim has been to write a general chemistry text that provides a firm foundation in chemical concepts and principles and to instill in students an appreciation of the vital part chemistry plays in our daily life.

Free Download Chemistry (10th edition) By Raymond Chang ...

Platinum is a moderately hard metal (MH 3.5) of low mechanical strength, with a close-packed face-centred cubic structure (BCN 12). Compared to other metals in this category, it has an unusually high melting point (2042 K v 1338 for gold). Platinum is more ductile than gold, silver or copper, thus being the most ductile of pure metals, but it is less malleable than gold.

Metals close to the border between metals and nonmetals ...

The chemical elements can be broadly divided into metals, metalloids and nonmetals according to their shared physical and chemical properties.All metals have a shiny appearance (at least when freshly polished); are good conductors of heat and electricity; form alloys with other metals; and have at least one basic oxide.Metalloids are metallic-looking brittle solids that are either ...

Wood is one of the most sustainable, aesthetically pleasing and environmentally benign materials. Not only is wood often an integral part of structures, it is also the main source of furnishings found in homes, schools, and offices around the world. The often inevitable hazards of fire make wood a very desirable material for further investigation. As well as ignition resistance and a low heat ...
