13. Found something about needing to remove the drivers side wheel and inner fender well. 14. Without removing ramps, jacked up the front left suspension to raise the tire off the ramp. Added a jack stand for safety. 15. Removed the wheel. 16. Removed three plastic rivets, which attached the plastic inner fender to sheet metal.

HELP! How do I remove the starter? 2005 5.7L | Jeep Garage ...

One of the more elaborate covers I've seen was when someone cut out the HEMI and 5.7L callouts using a Dremel, then secured a layer of semi-opaque plexiglass underneath the cover and placed LEDs around the perimeter, back-lighting the callouts. It was quite nice. Something like this (but with the 5.7L cover):

HEMI Engine Covers... | Allpar Forums

Next, remove the foam padding from the back side middle area. Now drill four 1/2" holes at the corners where the black cut out areas are. Use the keyhole saw to connect the dots. Try to leave about 1/8" of gray plastic beyond the black edge as viewed from the back and make the cuts as straight as possible.
