The magnetic coil on a Tecumseh engine interacts directly with the engine's flywheel in order to provide for proper motor operation. The distance between the two parts is known as the air gap. An improperly spaced air gap can result in engine failure. You can adjust the Tecumseh engine's coil in relation to the flywheel and correct air gap ...

How to Adjust a Coil on a Tecumseh | Hunker

Each Tecumseh engine has a date-of-manufacture code included with the model number that shows the day and year the engine was built--though for engines made before 2004, you still need to estimate the decade. The code also contains other information about the manufacture of the engine, such as the factory and production line where it was built.
