Configuring Software Internet Connection Sharing . You can share an internet connection across an ad hoc wireless network. To do this, designate one of your computers as the host (effectively a substitute for a router). That computer will keep the modem connection and must be on whenever you want to use the network.

For these kids, ham radio was the equivalent of today's smartphones or wireless internet, and allowed them to communicate with others around the world with no wires in between! For Dustin, Mike, and Lucas, ham radio was like a gateway into an invisible dimension, and an alien one, allowing them to connect wirelessly with some simple electronic components.
